services
working
for you

Our services

At a glance

We impress not only with our high-quality products but also with our first-class services.

Experience the difference!

01 Project manager

Your contact partners for all technical, commercial and logistical matters guarantee the problem-free progression of your project.

02 Specialist advice

We support you from the first contact and throughout all project phases right up to successful completion of the structure.

01

02

03

03 Project realisation

We develop formwork concepts that are tailor-made especially for your construction projects and take into account the technical and commercial requirements.

You can find more information here, or at www.noe.eu

07

07 NOE Academy

At NOE we believe that customer training events and factory visits are invaluable in ensuring that our customers are optimally equipped for their construction tasks and in developing new potential for future projects.

06

06 Repair

Our cleaning and maintenance service ensures the proper care of your formwork systems to prolong their useful life and avoid costly new expenditure on premature replacements.

05

05 Rental and logistics

Our modern formwork rental equipment and material-conserving working processes guarantee sustainability and transparency, while digital applications allow direct access to projects and ensure reliable budget planning.

04

04 Special solutions

Drawing on our years of experience in formwork construction, we create unique solutions that are specially designed to suit your project.

Everything under control

Your NOE project manager

Your contact partners for all technical, commercial and logistical matters guarantee the problem-free progression of your project.

1

2

Increase the efficiency of your construction projects and reduce costs with the advice and assistance of our experienced NOE project managers. Our experts continually adjust the material quantities to the actual progress on site, which leads to optimum material stocks and sustainable cost efficiency.

From efficient material planning and control to precise formwork and scaffolding planning all the way up to smooth-flowing logistics and reliable equipment returns – our project managers take on all the essential tasks. They act as your central point of contact to ensure frictionless project processes.

Direct advantages

- Optimised material use
 - Cost reduction
 - Efficient materials logistics
 - Central point of contact
-

We take care of your project from A-Z

Specialist advice

We advise and assist our customers working on residential, industrial and infrastructure construction from the initial enquiry and throughout all project phases right up to the successful completion of the bare structure.

With our expertise, we analyse each project to understand its specific requirements and develop customised, sustainable solutions for the various construction processes.

Our advice is held in high regard and provides you with planning certainty, on which objective decisions can be made.

Direct advantages

- Time savings during planning
- Prompt order processing
- Optimum and efficient planning of the construction programme
- Planning security through sound advice

Use our expertise to your advantage

Project realisation

Based on a comprehensive knowledge of the technical and commercial requirements of a project, we work with you to develop tailor-made formwork concepts. In doing this, we always keep an eye on budget planning to determine the optimum use of the materials and thus also take into account the needs of subsequent project phases.

By working closely with your site management, we are able to save time and react flexibly to any disruption of the project programme. We understand that customer satisfaction cannot be taken for granted. Consequently, we place great emphasis on proactive communication to ensure everything runs smoothly.

Direct advantages

- **Tailor-made formwork concepts**
- **Greater flexibility and reactive capacity by working closely with your site management**
- **Budget oriented**

Prepared for everything

Special solutions

Direct advantages

→ Tailor-made solutions

→ Experts at your side

→ Time and cost savings

The unusual shapes, dimensions and construction details that come with your project are no problem to realise, thanks to the expertise we have built up over many years.

There is no “That won’t work!”

Drawing on our many years of experience in formwork construction, we provide you with tailor-made special solutions. From tunnels to bridge abutments, right up to circular formwork construction – we make everything possible. We develop concepts that are specially matched to your requirements. This includes not only unusual shapes and dimensions but also the constructional details that come with your project. Our expertise allows us to create workable solutions that are perfect for the specific features of your projects.

1 Sophisticated shape in the tunnel trough area
2 Our experienced colleagues master any challenge with competence and commitment

Always an answer

Rental and logistics

The NOE rental formwork service can be relied upon to deliver orders for formwork and scaffolding material precisely when the customer requires them

We are particularly proud of our state-of-the-art rental formwork facility, which guarantees sustainable use of the equipment while conserving our material resources. Our working processes are designed to handle formwork materials carefully and maintain our high quality standards.

We believe that transparency of supply and delivery information promotes effective communication on both sides. In addition, we also offer alternative cleaning and services packages that give our customers clarity and additional confidence in their budget planning right from the time they place their order.

- 1 Rental formwork returns are checked for any damage to preserve quality and maintain safety
- 2 Cleaning using the latest technology

Direct advantages

- Professional material coordination

- High material availability results in short delivery times

- All formwork products meet GSV's high quality standards

With the latest techniques

Repair

We see to it that your formwork is professionally cleaned, repaired and reconditioned

Our cleaning and maintenance service offers you comprehensive solutions for all current formwork systems. We see to it that your formwork is professionally cleaned, repaired and refurbished to ensure lasting, long-term performance.

Our experts do their cleaning and repair work properly not only to extend the service life of your formwork but also to avoid you having to spend money on its premature replacement. By performing regular servicing, we can be sure that your systems are always in faultless material and operational condition.

Direct advantages

- **Comprehensive solutions for all current formwork systems**
- **Extension of the service life of your formwork**
- **Regular servicing ensures that your systems are always in faultless condition**

- 1 Regular quality checks
- 2 Cleaning using the latest technology
- 3 Repaired by our experts

Learning never stops

NOE Academy

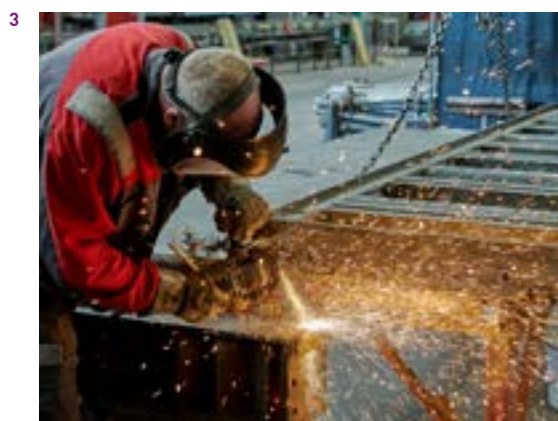

Direct advantages

- Focused training
- Deeper insight into production processes
- Professional development

Our product training events pass on practical knowledge to enable the optimum use of our formwork systems.

Optimally equipped for your tasks

Formwork and scaffolding technology is continually developing in the search for efficient, innovative and sustainable solutions. At NOE we believe that customer training events and factory visits are invaluable in passing on new practical knowledge and for ensuring that our customers are best equipped for their future construction tasks. Our factory visits not only offer insights into important processes but are also combined with product training. During these events, we place great emphasis on discussing and exchanging experiences with our customers. Appreciating what makes NOE special creates confidence and opens the way to further potential for future projects together.

- 1 Customer training on our factory site in Süßen: Practical knowledge gained on the spot.
- 2 Practical and informative: product training on our NOE deck formwork.
- 3 Knowledge that connects: Skills transfer through our NOE colleagues.
